

PREMIUM BUFFERED LOOSE & READY-TO-USE CLEAN COCO COIR

Coco coir substrates have become an incredibly popular choice for agricultural operations. This soilless growing substrate is made from fibrous coconut husks, offering a more easily usable, consistent, and efficient medium for modern growers. It is also incredibly versatile, as it comes in a variety of forms and can be used for plants in hydroponic, indoor, and outdoor settings. Rx Green Technologies' lineup of Clean Coco Coir products has been strictly tested and sourced by our in-house quality control team. Our coco is rich in calcium nitrate $\text{Ca}(\text{NO}_3)_2$ to promote plant vigor, strength, and better nutrient uptake for optimal yields.

**POTENTIAL FOR HIGHER YIELDS
OVER OTHER MEDIUMS**

**WORKS WITH ANY NUTRIENT REGIMENT
& GROWING ENVIRONMENT**

**SUSTAINABLY SOURCED AND EASILY
COMPOSTABLE**

WHAT MAKES OUR COCO DIFFERENT

- All raw materials in our Clean Coco Coir products are OMRI-listed®.
- Rx Green coco is always stored inside and shipped via covered trucks and shipping containers, ensuring protection from environmental elements, toxins, and pests.
- Coco is triple lab-tested: at its source, upon arrival at our US manufacturing facility, and again before it begins its journey to you.
- Our 3rd party lab partners test for pH, EC, mineral content, heavy metals, pesticide residue, and microbials. If a coco batch does not meet our testing standards, it does not leave our warehouse.
- All coco products can be composted after use.
- We partner with suppliers who focus on sustainability as well as environmentally safe practices for the betterment of the planet and the communities they operate in.

OUR COCO

Our coco is traditionally available in two blends, 100% pure or 70/30 coco/perlite, but thanks to our US-based manufacturing team, we are able to customize blends upon request. Whether you prefer loose, or compressed coco, we proudly offer multiple formats to support your garden's unique needs. So, no matter how you want to grow, we've got a science-backed solution for your operation. Compressed coco is available by special order, so contact us for more details.

READY-TO-USE COCO GROW BAGS

An efficient and effective solution for operations of all sizes, our RTU Coco Grow Bags come filled with pre-hydrated coco, enabling you to Rip, Roll, Plant, and Grow — it's just that simple. Support healthy plant growth at every stage while reducing time and labor related to transplanting and turning over at the start of each new cycle.

Products	100% LOOSE	70/30 LOOSE
